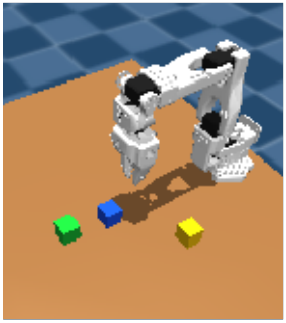
(a) RGB-D observation

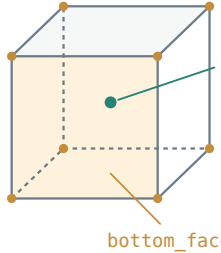


Recorded side RGB
+ calibrated depth

(b) Metric geometry

Points, edges, and faces

Schematic geometry



Geometry + evidence
Hidden surfaces are inferred

(c) Text + symbols

object: green

center [m]
(0.12, -0.01, 0.10)

goal: place on blue

to_goal [m]
(-0.02, 0.03, -0.04)

Illustrative values; world frame

`green.bottom_face`

`blue.top_face`

(d) Agentic policy

LLM reasoning
Revise policy / choose actions
Between rollouts / online decisions

Policy / skill execution
Local sensing + robot control

Prior policy experience
Online skill reuse

Online execution: reason, act, observe — no reset until success or timeout

Gray dashed: hidden geometry Purple dashed: online execution / skill reuse
